

PET-CT Technologist

UPMC Hillman Cancer Center

Zabok, Croatia

About UPMC Hillman Cancer Center

UPMC Hillman Cancer Center connects patients with the integrated expertise of leading clinicians, academic researchers, specialized programs, and treatment centers. Headquartered in Pittsburgh, PA (USA), UPMC Hillman operates more than 70 cancer centers in the U.S., with five cancer centers in Ireland and Italy. In 2025, UPMC Hillman will bring state-of-the-art therapies to Croatia on the campus of Zabok General Hospital, about 40 km from the capital Zagreb. The facility will include medical oncology and radiation oncology, as well as PET-CT services. **We are currently hiring a PET-CT Technologist for our facility.**

Position Overview

The PET-CT Technologist at UPMC Hillman Cancer Center Croatia is responsible for performing PET-CT imaging procedures to assist in the diagnosis and treatment of various medical conditions under the direct supervision of the practice physicians and/or nuclear medicine physician. This role involves preparing and administering radiopharmaceuticals, operating PET-CT scanners, and ensuring patient safety and comfort throughout the imaging process. The technologist must have a strong understanding of both PET and CT imaging techniques and protocols.

Job Requirements

- Completion of a formal nuclear medicine training program, with a CT background.
- At least two (2) years' experience in a clinical setting, specifically with PET-CT imaging, is required.
- Strong understanding of PET and CT imaging principles and safety protocols.
- Proficiency in reading, writing, and speaking English and Croatian is required.

Responsibility

- Prepare and administer radiopharmaceuticals to patients according to established protocols.
- Operate PET-CT scanners to obtain high-quality diagnostic images.
- Monitor patients during imaging procedures to ensure their safety and comfort.
- Maintain accurate patient records and document all procedures performed.
- Ensure compliance with all safety regulations and protocols to minimize radiation exposure.
- Perform quality control checks on imaging equipment and report any malfunctions.
- Educate patients and their families about the PET-CT procedures and address any concerns.
- Stay updated with advancements in PET-CT technology and techniques.
- Maintain strict patient privacy and protects patients' confidential information.
- Performs other duties as assigned

Interested candidates

UPMC offers competitive fees and benefits. Candidates should be proven leaders and demonstrate a passion for excellence in providing exceptional patient care. To be considered for this role, please send a cover letter and resume. For more information on this opportunity, contact Gina Matolcsy in HumanResources@upmc.hr.
