

EPIC Training Program Financed by the New Skills Fund #3 and by Fondimpresa

UPMC Italy, IRCCS ISMETT, and Salvator Mundi International Hospital access the **Excellence of People through Innovation for effectiveness in Care (EPIC) system-wide training program funded by the *Fondo Nuove Competenze 3* [New Skills Fund] and Fondimpresa.**

This program will involve close to 1,000 professionals from UPMC Italy centers as a strategic leverage for developing skills and fostering the sustainable growth of the organization.

The project will support UPMC's evolution in key areas of change, including digital innovation, sustainability, organizational well-being, and technological development.

Combining formal classes and e-learning, the training programs will be launched in 2026, with content tailored to each professional area (physicians, healthcare professionals, and administrative staff).

The New Skills Fund "Skills for Innovation" is a Europe 27 project, a strategic initiative within the National Program for Youth, Women, and Work 2021–2027, co-funded by the European Union.
